

## *Guiding you to a secure future*

**Peritus Investment Consultancy** is a specialist in wealth guidance based on traditional service values combined with innovative and sophisticated investment expertise. Located in Switzerland, we provide guidance through the difficult process of choosing investment managers, and our comprehensive service is designed to give you peace of mind that a trusted advisor is watching over every aspect of your investment needs. Our partnership structure offers the benefits of a long term relationship and institutionally negotiated fees demonstrate our complete impartiality and transparency.

The company investment philosophy believes that in any financial climate, hard earned wealth needs to firstly be preserved and then grown. In addition, no single style or approach is effective in dynamic markets and the selection of active managers is the only solution that will guide you to a secure future.
